David Fincher's team on Stage 8/9 testing out the new 9" RED PRO TOUCH LCD :)
(shipping in october. No information on price or resolution as yet)

NEWS

- [Half a Pound.....](#) 235 grammes... quarter of a kilo.

New technology has afforded us the ability to move to a new heatsink that has the same thermal characteristics in a much lighter package.. saving 1/2 a pound on the weight of the EPIC brain.

These new heatsinks will go into all EPIC-X cameras... and EPIC-M customers will have theirs upgraded, for no charge, when they send the cameras in for the mechanical modifications after the EPIC-X program begins.
